

Beispiel für das Senden in C#

```
data = File.ReadAllBytes(File2Upload);
ConfigureSSL();
request.ClientCertificates.Add(ClientCertificate);
request.Method = "POST";
request.ContentType = "text/xml; charset=utf-8";
request.ContentLength = data.Length;
using (Stream stream = request.GetRequestStream())
{
    stream.Write(data, 0, data.Length);
}
Response = (HttpWebResponse)request.GetResponse();
StreamReader reader = new StreamReader(Response.GetResponseStream());
string str = reader.ReadToEnd();
string message = String.Format("LIF_ResponseText: {0}\nLIF_FallID: {1}",
HttpUtility.HtmlDecode(Response.Headers["LIF_ResponseText"]),
HttpUtility.HtmlDecode(Response.Headers["LIF_FallID"]));
```
