Informed consent – COVID-19 mRNA vaccines

Version 10.4, as at: 28/03/2022

Following vaccination against COVID-19, reactions to COVID-19 mRNA vaccines often occur which usually go away on their own within a few days. Pain or swelling may occur very often at the injection site; reddening, rashes or urticaria may occur often. Moreover, (extreme) tiredness, headache, muscle and joint aches, joint stiffness, swelling in the armpits, nausea, vomiting, diarrhoea, shivering and fever may occur very often; rashes may occur often. Very often means that more than 1 in 10 vaccinated persons are affected; often means that up to 1 in 10 vaccinated persons is affected. Severe allergic reactions may occur. Myocarditis and pericarditis were reported very rarely. Physical rest is recommended for three days after vaccination, and sports should be abstained from for one week. For details, please refer to the information leaflet provided electronically. You may also request a hard copy of the information leaflet. Should you have any further questions, please get in touch with your doctor. In order to access the information leaflet of the approved COVID-19 vaccines, please scan the QR code (https://www.basg.gv.at/konsumentinnen/wissenswertes-ueber-arzneimittel/covid-19-impfstoffe).

With my signature I confirm:

- that I have read and understood the leaflet regarding the vaccine described therein, or that I was otherwise provided with sufficient information about the same. I have been able to obtain information about potential adverse effects and possible arguments why I should not be vaccinated.
- that I am appropriately aware of the benefits and risks of the vaccination and accordingly do not require any further personal consultation,
- that I consent to being vaccinated free of charge, and
- that I am aware that my personal data are going to be processed in the vaccination register in accordance with the Gesundheitstelematikgesetz 2012 (see https://www.elga.gv.at/datenschutzerklaerung).

The use of COVID-19 vaccines as 3rd dose has been approved if the same vaccine is being used for persons aged 18 and above after six months following the 2nd vaccination. Other applications have not been approved yet. However, the currently available data suggest that vaccination is also safe and effective if other regimens recommended by the National Vaccination Committee (NIG) are applied.

Should you have any further questions, please get in touch with your doctor before signing this form.

If it is not possible to speak with the vaccinator on site (e.g. in case of **vaccinations at school**), please contact the medical service/public health department of your competent local administrative authority and sign the informed consent only after having obtained sufficient information.

For underage persons (children under the age of 14) or persons under disability, consent must be obtained from the legal representative (parents, legal guardians or authorised agents) of the person to be vaccinated. Adolescents (mature underage persons who have completed the age of 14) must give consent themselves if they are capable of making decisions.

Date (DD/MM/YYYY) **Signature of the person to be vaccinated or their legal representative**

Important information: For your own safety, you should stay near the vaccinating doctor for some 20 minutes, on the off chance of any reactions occurring (nausea, collapse, allergic reactions etc.). If you suspect to experience any adverse reactions, please contact your doctor or pharmacist. They are obliged to report any suspected adverse reactions.
However, you or members of your family may report adverse reactions as well. More information is available online at https://www.basg.gv.at/marktbeobachtung/meldewesen/nebenwirkungen; you can also call 0800 555 621.
